THE EDUCATION COLLABORATIVE

2023 June Convening

Education Collaborative's Approach to Applied Research

Applied Research

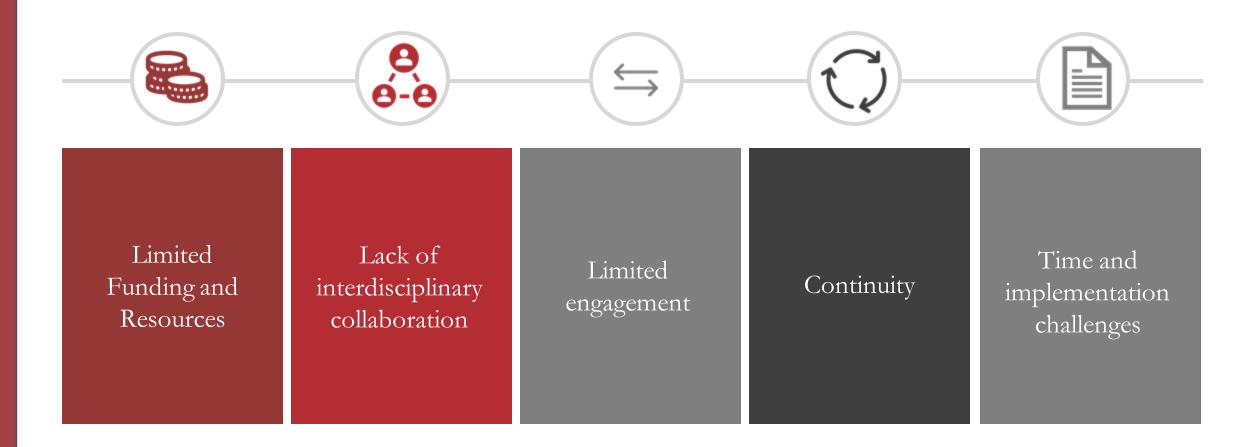

Solving a specific problem or providing **innovative solutions** to **issues** affecting an individual, group or society.

Sometimes considered a **nonsystematic inquiry** because of its direct approach to **seeking a solution to a problem.**

Identify a problem, develop a research hypothesis and test these hypotheses.

Challenges in Applied Research

EduCollab's Approach

Funding and Resources

Meaningful, practical engagement

Interdisciplinary collaboration - RCoP

Knowledge-sharing and capacity-building initiatives

Establishment of research partnerships

Edu Collab's Theory of Change

Impact	The Education Collaborative is working toward a "Transformed higher educational ecosystem that contributes to socio-economic development in Africa".				
Long-Term Impact					
Short-term Outcomes	Outcomes of research informs policymaking, regulation and systems change within institutions				
	Participants will develop best practices in research management and built collaborations to access cross-institutional learnings, capture data for improved research outcomes, and amplify their research impact. Edu Collab will collect and share evidence of learnings, proceedings and outcomes from Edu Collab activities and approach to build credibility and thought leadership in our core areas.				
- Online repository (learning hub) Outputs - Publications, policy briefs, reform proposals, and reports on key developments, learnings and insights shared and discussed - Learning Tools - videos, manuals, guidebooks, etc					
Activities	Facilitate a CoP	Provide Research Grant Funding	Develop Online Repository	Manage Data Systems	Facilitate Publications

EduCollab's Approach - Conclusion

Engage by joining our Research Community of Practice
